

EARTH GODDESS—WEBISODE 8 OF RESET:

When XANDER, PEARL, JUSTIN and LYDIA do their research in the local library, they notice that many of the pictures of goddesses from Ancient times have something in common... they are shown with a halo, or light, beaming out from their heads. This makes them wonder if the lady they saw in the light might have been seen by other people in the past too.

TRACK THEM DOWN:

Search for IMAGES online using keywords like “ancient goddesses”, “goddess deities”, “halo images” and “ancient goddess halo”. See what images you can find that have some form of light around their heads. Copy or print them out and be sure to find out the following information for each image: NAME OF GODDESS, RELIGION OR CULTURE they came from, and CENTURY the image is from. Compare your images and see what they have in common and what the similarities and differences are.

If you get stuck, try looking up some of these— Mitra, Mary, Amaterasu, Isis, Hathor, Parvati, Chang’e, Durga, Kwan Yin, Ceridwen and Liberty. Or look up goddesses by ancient culture or geographical regions such as China, Japan, Egypt, India, Mesopotamia, Persia, South America, Greek and Roman.
